The DALEK has customizable settings for opacity, frame rate and speed, and can be placed in the system dock. Ubuntu touch Ubuntu touch is a fork of the Ubuntu operating system which runs on smartphones. It is an operating system based on the Android Open Source Project, with a new user interface designed to work well on small screen devices. The "Ubuntu" name was chosen to differentiate it from other devices running Android, which are generally referred to as "Androids", or "AOSP Android". The fork was created in February 2012. The operating system was initially released for the Nexus 4, Nexus 7 (2012), and Nexus 10, but it is supported on any device using the Ubuntu desktop, even if not manufactured by the original manufacturer. On July 25, 2013, a new version of Ubuntu touch was released for phones and tablets with Android 4.3 or higher. As of February 2014, Ubuntu touch is the primary operating system on the Nexus 5. In June 2013, Canonical launched the "Ubuntu for phones" project for phone manufacturers to create Ubuntu phones running Ubuntu Touch. The first Ubuntu phone, the Bq Aquaris M10, was released on October 13, 2014. History In August 2009, Canonical announced plans to create a mobile operating system called Ubuntu Moblin that would run on mobile phones. With the rise of the tablet market, Canonical expanded its mobile operating system to run on tablets and released Ubuntu Netbook Edition in January 2010. In April 2011, Canonical announced the release of the first Ubuntu for mobile phones under the code name "Ubuntu One" during the Ubuntu Developer Summit. With the announcement of the Ubuntu Phone Summit in June 2011, Canonical said they would launch Ubuntu for Phones in 2012. Canonical also presented a new tablet-optimized version of the Ubuntu Moblin operating system, Ubuntu Touch, at the Ubuntu Developer Summit in June 2012. The DALEK is a small widget designed for Yahoo! Widget Engine that installs a desktop companion with a Dalek. The DALEK

Keymacro configures the icon title and the Dalek's quote to resemble a Windows shortcut. The shortcut is specified by a key combination, and the "Dalek" icon title, "Exterminate" catchphrase and the background image are stored inside. The key can be set to a short letter, a word, or a phrase. The image can be set as an animated gif or as a background-only picture. The point is that once the key combination is set, any user that types it on the keyboard to access the shortcut will activate the gadget without need to click it first. This is a new version of the original Y!WEXDALER gadget which can be found at the below link. This version has been completely re-written in order to add the ability to be compatible with the latest Yahoo! Widget Engine and works on all operating systems. The original widget, can be found at the below link. ****Please note: The original widget by itself does not create a shortcut and requires this script. Also, this widget does not save the desktop image as a .png or .gif as most widgets do. Instead, it stores it as a .ico file. Thus, the original widget requires this script. Currently, this script is tested on Windows 7 and Windows Vista, but works on all major operating systems. Also, this script is tested and is compatible with both the original Y!WEXDALER gadget and the WEXDALER v2 widget. Yahoo! Widget Engine allows a user to hide and show widgets. The "View widget details" option allows a user to see all available widgets that can be installed into a panel. Here is a short tutorial on how to use the panel widget from Yahoo!. How to install the original Y!WEXDALER: 1. Download the Y!WEXDALER widget. Click the link to download the latest version at this link. 2. Open the downloaded file and click "Install" button to install the widget. How to install the WEXDALER v2: 1. Download the WEXDALER v2 widget. Click the link to download the latest version at this link. 2. Open the downloaded file and click "Install" button to install the widget. 3. You will be prompted to select a panel where you want the gadget to be installed. 4. Click "ok" and the widget will be 1d6a3396d6
