Send and receive emails, messages, voice mails and documents with full office features. Multilanguage support and under GPL license. Wow that's a lot of mail! Whether it's for work or pleasure, managing an email account can be a big job. Luckily, you don't have to do it yourself anymore. The new Microsoft Outlook for Android has been designed specifically to take the pain out of your email experience. It's simple to setup, easy to manage and it even has native mobile browsing so you can see your emails on the go. Everything You Need in One Email Microsoft Outlook for Android gives you all the features you need for your inbox. Its sleek interface lets you navigate faster and more intuitively. You can pin important emails to your view so you always have them front and center. And with its easy Smart Folders, you can manage all of your email in one place. Search to find the emails you're looking for. And thanks to its built-in Microsoft Exchange support, you can access all of your emails from anywhere. Enhance your inbox experience with OneDrive Integration With OneDrive, you can easily access all of your files from your email account. Get all of your documents, spreadsheets, presentations and more from your email using OneDrive.

Quickly attach files from OneDrive to your email and it will sync your emails automatically. And when you're editing a document from your email, you can choose to have your changes sync back to your PC. Email-ready with native mobile browsing Outlook for Android gets you access to the email, calendar and tasks you need, right from your mobile browser. Send and receive emails, messages, voice mails and documents on the go. Plus, it's super fast and has native mobile browsing. So you can access your email and manage your calendar while you're on the go. In the future, the Office suite will be coming to your phone — it's only a matter of time. One of the key features that is missing from the latest version is the ability to access (share, sync, etc.) calendars through the app, but if that option makes it to the software, it'll be a very welcomed update. For now, you can now get your work done on Outlook for Android. Microsoft Outlook for Android Download Download Outlook for Android on Google Play.
