## System Requirements:

For those who want to learn more about the game, we have made an excellent resource on the official website. When the game was announced, there were rumours of being able to play with co-op. This was later confirmed by the company. After the game was released, there were rumours of a demo coming soon, but this was never confirmed. We have sent out many mails requesting the demo, but to no avail. However, some of our readers have kindly sent in information which has now been added to the official website, which you can view here.
