The database can store multiple contact information such as email addresses, phone numbers or job titles. You can customize the database structure by changing the lists that include the phone and address types. The user can perform complex searches and export the results to an Excel document that can be edited and saved to the disk. Description: Customer Contact Database is an example of an Access database with multiple lists and fields to store customer contact information. This sample contains over 13 different lists and fields. The custom list can be sorted, search and exported to an Excel document. You can find more information about this database on my website: Introduction to Macros With the introduction of MS Office for Macintosh, Microsoft has added several support features for the Macintosh OS. One of these features is the ability to create and run Macros. Macros enable you to automate repetitive tasks in your day-to-day activities. Perform tasks that have become very time consuming using the macro feature You can write Macros that help you to enter data, calculate information, process text, perform searches and generate documents. Some examples of macros are: Macros for checking spelling of data entered Macros for categorizing and tagging documents with a brief description Macros for printing documents Macros for formatting documents Macros for organizing email messages Macros for archiving documents Download the user guide to Macros. If you find the instructions difficult to read, you may choose to have a program such as Speak It! to read the text aloud to you. Speak It! also works with other programs including Microsoft Word and Excel. When you first launch the application, you will see a dialog box that says "Speak It Now". Click Yes. You will hear the instructions read to you from the documents. You can press "Done" when you are done listening. Get Speak It! Download Speak It! from the Apple App Store. For more information Speak It! allows you to read documents aloud. Visit my website at on how to get Speak It! and the Macintosh version of my website, Audio
