Getting naked and showing off my body is something I always enjoy." - Jojo Kiss "A week without looking at porn is a bit like going a week without breathing. I just love the sexy and alluring girls that I see posing in all different positions for my viewing pleasure. My favorite is when girls get naked and do a little dance for me before they start doing everything

What's New in the?

Desktop Paparazzo is a handy and reliable utility designed to enable you to capture screenshots of your desktop. Some elements are sometimes camera shy. Perhaps you want to capture a hint, popup or menu item but every time you press the print screen button your subject disappears from view. Well, DesktopPaparazzo is here to help, simply specify a time interval and a folder then DesktopPaparazzo will snap away and provide you with a collection of screen shots leaving you free to set up the screen how you want it. DesktopPaparazzo is extremely easy to configure, you can even decide whether you want to capture the mouse pointer in your screenshot or simply capture the content of the screen. All that in a snap.Q: ggplot2, ggvis and hover not working together I'm trying to plot data with ggvis in combination with ggplot. I just want to plot a line with hover information (I could not find a way to do this for different layers at once, so I made it work for a few of them). I tried this: library(ggplot2) library(ggvis) data1
