## **Resident Evil 4 CODEX**

Zeszyty - PC - (2009) A: From the Wikipedia: It has been suggested that these games are based on sketches by Masachika Isoda, a Japanese illustrator who

is well known for his satirical manga, Back Stage Pass. Also, in the 2006 remake of the first Resident Evil, the Resurrection series was greatly inspired by Isoda's work. Masachika Isoda also worked on a

comic series titled Monster Mosaic which was heavily influenced by the Bioshock series. And it's not just anime too. There's other works like Sakamoto Gahara's The Noisy Night (?) which has many of the

4 / 13

same ideas as Ooishi. To do further research into this part of Japanese culture you'll have to look into the history of anime and manga. A: The wiki itself states that the game series is based on the

novels by Koichi Ito (note: not the same Koichi Ito as in.hack//mutation and.hack//roots), with minor modifications (mainly in the fighting engine) from Capcom (also note that they

acknowledge that the fighting engine is a slight modification of Stuntman, but that the base code is from Capcom). Based on that, and the fact that the anime began around the same time

the novels came out (the fact that it's heavily influenced by GARO does add on further to the question), and that the names are similar (Ooishi), it's probably safe to say that the game and anime are

based on the same thing. With that said, it's more likely that the things done by GARO are in the game too (seems they are), and Koichi Ito's novelization of GARO is heavily based on the anime

(there are slight differences, but it's the same basic story). import { Search } from "../search"; import { SearchError, SearchMetadata } from "../search/search"; import {
