FIFA is the most popular club football video game of all time. Its rise to fame has been nothing short of phenomenal, with the game selling over 100 million copies worldwide in a little over a decade. Created by the legendary EA Canada and released for the PC, PlayStation, PlayStation 2, Game Boy Advance, Game Boy Color, GameCube, Wii, PlayStation 3, Xbox 360 and the Nintendo DS, FIFA has become more than just a football game - it's become a phenomenon. In this new edition, we introduce a new generation of players to FIFA, tailored to the most advanced FIFA technology ever. New features: The return of "Player Impact Engine" The Impact Engine allows for more ball control and manipulation for the difference-makers. Players on the ball can now make and save more precise tackles, more agile runs at the ball, and more precise passes. "Players Trajectories" 'Players Trajectories' keeps the ball on the field for longer allowing players greater chance to make more precise passes and to receive the ball higher up the field. "Player Roles" The "Player Roles" allow players to influence their own role and game. Player roles are keyed off player attributes such as speed, physicality, and agility. Speed of Game "Speed of Game" more accurately represents the pace of actual football in real-life. Tactical Media "Tactical Media" connects tactics to new ways of communicating and understanding what is happening on the pitch. "Defender Trajectories" Starting with this iteration, "Defender Trajectories" is a key element of the match. This new feature provides the coaches with more tactical intelligence and the ability to have full control of the flow of play. Coaching Master Class The Coaching Master Class allows coaches to manage the game and progress of individual players in any situation, by giving immediate feedback on actions and over-riding the occasional decision. English Premier League & UEFA Champions League licensed teams (incompetitions the key determinant) The season of FIFA went on hiatus because of the World Cup this year (2014)... and we came back with the all-new FIFA Season Mode (online and offline) with all the official UEFA Champions League and English
