Layer-based editing A _layer_ is a way to organize an image into a series of raster bits, or pixels. When you make an image in Photoshop, you start with one or more raster layers. The layers are the best way to keep your image organized and clean. You make changes to one layer, and it doesn't necessarily change the next layer that lies directly beneath it. Layers let you work on the image as a whole or by sections. Most people use Photoshop as a _flat_ image program, making layers a fairly simple concept. By using layers and using them to make changes to your image, you can find many ways to manipulate your images. Layers are also the feature of Photoshop that makes digital photographs editable. You can manipulate a photo, separate it into different layers, and combine these layers to make different aspects of the photo. In addition, you can move and resize any element in a layer, including moving a layer to a new position and deleting it. You can rearrange the order of layers by dragging layers on top of each other. A layer doesn't permanently change the original image — only the visible effect of that layer does. You can save layers as groups for easy reference; see the sidebar "Create a new group

A Few Differences If you're looking to create amazing photos or other images that require some background, you'll need to use Photoshop to add an extra layer. Photoshop Elements offers a wide variety of built-in effects and filters to help you create the perfect image. For example, you can duplicate a photo, adjust its brightness, zoom in on particular parts, add textures, and much more. Photoshop Elements doesn't have the same kind of options that Photoshop does. If you're looking to crop or straighten an image, Photoshop Elements will do that automatically and without making any adjustments to the rest of your image. Filters and tools The tools in Photoshop Elements are simpler than those in Photoshop. You get more options on each tool but it's not as simple as manipulating one specific layer. The tools in Elements are: Smudge tool: This tool is similar to the brush tool in Photoshop. You can easily move the tool across the image to make changes. You can also paint with the tool to make changes to different parts of the image. There is no predefined brush shape but you can use a circular shape to quickly edit the entire image. Rectangular Selection tool: This tool works similarly to the marquee tool in Photoshop. You use it to select small sections of the image. You can easily use this tool to edit in small areas or add a background to a picture. Gradient tool: This tool is similar to the paint bucket tool in Photoshop. You can apply a color gradient to change parts of the image. You can use the tool to add backgrounds or even use it to change the overall brightness of the image. Airbrush tool: This tool works a bit like the nozzle tool in Photoshop. You can use the tool to easily add textures to photos or change colors. You can use an airbrush to add more layers to an image. Pencil tool: This tool works like the pencil tool in Photoshop. You can use it to erase areas of the image, change colors or add textures. Lasso tool: This tool works like the lasso tool in Photoshop. You can use it to easily change areas of the image and create selections. Chisel tool: This tool works like the tool in a compass. You can use it to easily create shapes or add text to the image. Rectangular Marquee tool: This tool works similarly to the rectangular 05a79cecff

Q: how to share only a file in google drive in android? I am developing an Android app for file sharing. I want to share only a file in google drive using a button click in my app. I did it with share intent but it has options like email, camera, chat and one option for sharing only file. How can I share only a file without other options in share intent. Please help me. Thanks in advance. A: You can't do that. The idea behind Google Drive is that it's a universal way of sharing stuff, not "just" for sharing files. You can use it to share folders with others, to share documents, to backup your stuff via Google Drive, to backup your stuff on a cloud, etc. Here you have the documentation: #!/bin/bash # Copyright (c) 2014-2016, Intel Corporation # # Redistribution and use in source and binary forms, with or without # modification, are permitted provided that the following conditions are met: # # * Redistributions of source code must retain the above copyright # notice, this list of conditions and the following disclaimer. # * Redistributions in binary form must reproduce the above copyright # notice, this list of conditions and the following disclaimer in the # documentation and/or other materials provided with the distribution. # * Neither the name of Intel Corporation nor the # names of its contributors may be used to endorse or promote products # derived from this software without specific prior written permission. # # THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND # ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED # WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE # DISCLAIMED. 1. Field of the Invention The present invention relates generally to a device and method for filling a container. 2. Description of Related Art Various techniques have been used to prevent beverage spills and to purify a beverage such as a coffee beverage or a soft drink. Coffee may be presented in a beverage holder having a cup element for holding the beverage and a lid element for covering the cup element. The cup element may be formed from a paperboard material. The lid element may be formed from a material other than paperboard, such as a plastic material. The cup element may be formed by the structure disclosed in U.S. Pat. No. 6,073,802 to Schirmer et al. which is hereby incorporated by reference in its entirety. Many beverage holders include a straw element for drinking the beverage through the holder. The straw element may be separate from the holder and include a straw cup with a handle, with an optional straw holder element. Alternatively, the straw element may be directly integrated with the cup element of the beverage holder. The straw element may be composed of a paperboard material. The lid element may be formed by the structure disclosed in U.S. Pat. No. 6,517,061 to Schirmer et al., which is hereby incorporated by reference in its entirety. It would be desirable to provide a device and method for filling a container.The LA Galaxy and the Colorado Rapids were both trying to win their respective game, but they are both suffering the consequences. Colorado were inspired by a last-minute own goal from Galaxy goalkeeper Brian Rowe to come from behind to beat LA 2-1 in a game that was tightly-contested, but also ended up one of the most exciting in MLS this season. "This is an exciting time of the year and to come out of Colorado and get a point is really good, especially at home," said LA head coach Sigi Schmid. It was the first time Rowe suffered a home defeat in MLS after 11 games and the Galaxy have an indifferent start to the season with only one win in four games. But LA have now lost in three straight home games - two to Atlanta and the Rapids - and the forwards' inability to break through the Colorado defense has been critical. "We're in a moment now where we're really in a position of trying to establish our standards and our rhythm," Schmid said. �
