Review Movies, Games and Q: How do I add HTML markup to an encrypted YAML document as a string? I'm trying to encrypt some data and then add a bit of HTML markup to it that will later be parsed when decrypted. I've already looked at a few examples on StackOverflow and more or less understand how to create the encrypted data, but I have no idea how to represent the HTML markup so that it will be rendered properly during decryption. Here is some Ruby code that represents my encrypted and encoded data. encrypted data encrypt
