- Mathematical functions - GUI - Editor (Script) - Script files can be edit via editor - Editor (Script) and GUI supports tab for multiple expressions - GUI supports preview for multiple expressions - Easy to use 920 So.2d 1236 (2006) J.D. v. L.A. 2040752. Court of Civil Appeals of Alabama. December 1, 2006. Grady R. Morris, Anniston, for appellant. No brief filed on behalf of appellee. BRYAN, Judge. J.D. ("the father") appeals from an order of the Calhoun Juvenile Court denying his motion requesting a change of custody of his minor daughter ("the child") from L.A. ("the mother") to him and awarding the mother legal custody of the child. We affirm. The mother and the father were divorced in December 2004. The mother has primary custody of the child and resides in Virginia; the father lives in Alabama. The father had moved to Virginia in March 2005, where he lives and works. In September 2005, the father moved to Alabama to be closer to the mother and to the mother's residence. When he moved to Alabama, he and his girlfriend at the time lived with the mother's mother and brother. In December 2005, *1237 the father and his girlfriend moved out of the mother's mother's house and into a trailer in Bossier City, Louisiana, where they lived for several months. In January 2006, the father returned to Alabama and he, his girlfriend, and the child moved in with the mother in her mother's house. Shortly thereafter, the father filed a motion for a change of custody of the child alleging that a substantial change of circumstances had occurred in that the mother had relocated to Alabama in violation of the father's visitation rights. The mother responded to the father's motion. On October 18, 2006, the court held an ore tenus hearing on the father's motion. During the hearing, both the father and the mother testified about the child's medical condition; about the places where the father and the mother had resided; about the effect that the father's move to Alabama had had on the child; about the father's financial and parenting skills; and about the father's dishonesty. After the hearing, the court entered an order denying the father's motion. The court's order states, in relevant part: "Upon consideration of the testimony and

JMathLib is a library of mathematical functions designed to be used in evaluating complex expressions and displaying the results graphically. It works like Matlab, Octave, FreeMat and Scilab. JMathLib currently supports the following functions: arctan2(), arctan, asin, atan, acos, acosh, atanh, asinh, atan2, asinh2, atan2h, baserot(), baserot2(), baserot3(), basetens(), basetrans(), besselh(), besseli(), besselj(), besselk(), besselr(), besselu(), besselv(), bessy(), bessx(), bessy(s,x), beta(), cbrt(), cis(), cosh(), erf(), erfc(), exp(), fmod(), fibonacci(), fsum(), gamma(), gamch(), gammaf(), gammag(), gammamul(), gammacl(), gammacr(), gammcon(), gammint(), gammim(), gammip(), gammim1(), gammiz(), To install the package, just press the 'Install in a single click' button. You will see the GUI window. The 'Install in a single click' button leads to the 'Install' window. In this window you can select the type of install that you wish to do. Select 'Run my package'. You will be then asked if you want to Install one time or Install every time. Press the 'Install'. You are ready to go! What's New In?

- JMathlib is a simple and straight-forward package of mathematical functions which... AAJIB is a program written in Ruby, allowing you to generate PHP code from an RDL-based database. It works with SQL Server, MySQL, Oracle and PostgreSQL. For MySQL it supports INSERT, UPDATE and SELECT statements (UPDATE and SELECT... VariACS Plus is a professional and powerful financial software which works with any Windows version of Microsoft Office. VariACS Plus is a full-featured and easy-to-use software which helps you create a simple program for financial calculations. It supports vectors and matrixes,... Advanced Text to Speech Services is an Open source file format for transmission of data. It is primarily developed for re-use of pre-existing formats as well as to make use of open source TTS. It is capable of converting textual data in various languages into speech... VB3D is an easy to use tool for visualization, animation and 3D rendering of objects with VBScript. VPS2VBS is an VBScript to VBScript Coder, which translates VBScripts into VBScript VBModules. The VBScript to VBScript Coder transforms each line of VBScript into a separate command... ABBY is a cross-platform language interpreter for ABBYY's TXT-TO-SENTENCE language. It can either directly interpret the TXT-TO-SENTENCE files or can read and interpret.BLL files. ABBY can be used in Windows NT/2000, Windows 98/Me, Linux and MacOS 9/X. ABBY... This library was created to simplify the use of Python's standard Python readline module. It adds new commands to the readline library: - no user input is held in a global variable, the command line simply waits until you start typing - keywords arguments... Ages is a multi-threaded, fully-comprehensive, and fully-detailed library for generating source code from a Visitor-Pattern AST. Ages has extensive visitor support for all tree-based elements, including methods, classes, and mixins. It supports all

common Javascript... Epub is a new type of text and pictures. It is used to create a digital book just like the paper book. It is portable, small

System Requirements For JMathLib:

Minimum: OS: Windows 10 64-bit, Windows 8.1 64-bit, Windows 7 64-bit Processor: Intel Core i5-750 or AMD Phenom II X4 965 Memory: 8 GB RAM Graphics: NVIDIA GeForce GTX 650 Ti or AMD Radeon HD 7850 with at least 1GB VRAM Hard Disk Space: 2 GB DirectX: Version 11 Network: Broadband Internet connection Sound Card: DirectX compatible Additional Notes: If you have the older version of GOG
