About the author: Mars Costafoni (www.marscostafoni.it) "In the last few years, I've found myself in the middle of the .Net framework family: have been assigned to develop rich web applications for .Net 1.1, 2.0 and 3.0, using Ajax and other .NET technologies. At this point, I was bored of working with .NET Framework and all kind of ready to .NET toolkits. So I started to work at the .NET Core and .NET Standard. I've looked at some data structures, network protocols, logging and other common .NET programming areas, and I felt this was my opportunity to create .NET libraries useful for d0c515b9f4

JavaScript library tools can greatly enhance the capabilities of your web applications, but some browser tools will limit the JavaScript libraries and the features you can add to a web page. Toolkits for the most popular web browsers (including Internet Explorer, Firefox, and Safari) help you create, enhance, debug, and maintain JavaScript functions and behaviors in your web page.
