References Category: Populated places in Jiroft CountyQ: Get icon of a File object I'm calling a method which returns the File object, what I want is to get the icon of the file. The default icon of a file is the default icon from the operating system. I know that in Java 1.7, we can use the System Icons class to get the default icon, but how to do that in Java 6. How can I get the default icon of a File object? A: For Java 6, you can use the open source Java.IO library, which gives you read/write access to all things related to files. To answer your question, here's what I use to get the icon, taken from FileChooser, a JFileChooser wrapper: Path dir = new File(".").getCanonicalPath(); Path imagePath = Paths.get(dir, "icon.png"); if (!Files.exists(imagePath)) {
