It stars Nicholas Tse, Xiang Yun, Zheng Geping, Xu Ting'an, Wang Lin, Vincent Wong, Yu Nan, Yang Liwei, Zhu Linpeng, Li Sijia, Kenix Kwok, Simone Alice Tan, Xiaoyi Zhao, Chan Yin Chee, and Kelvin Tan. The series is well-known for its story-telling as well as character motivation and performances. It does not shy away from addressing current socio-political issues and the subject matter has a decidedly modern twist. The series is directed by Cherie Wee and written by Ronald Chew, who also wrote the scripts of the previous drama By the Book. The show is produced by Singapore's MediaCorp Creative Publishing, while Films in Focus handles the overseas sales. A spin-off, The Journey: A Girl in Time, was released on May 7, 2016. Synopsis The story revolves around a successful but unrequited father, Liang Jin (Nicholas Tse), and his family. Jin and his wife, Kang Jia Yi (Xiang Yun) and son Jin Zhencai (Zheng Geping) are the key protagonists. Since a tragic incident, Kang can never have children so she cares more for her son than Jin. After a devastating discovery, Jin and his family must leave his home and start a new life in London. Jin changes and grows, as he befriends the childhood friend of his wife, Yuan Yuan (Wang Lin), a teacher who rescues him from despair. Cast Original cast Nicholas Tse as Liang Jin Xiang Yun as Kang Jia Yi Zheng Geping as Jin Zhencai Wang Lin as Yuan Yuan Yu Nan as Chen

Cryotherapy is a low temperature therapy that uses a ring or other device to shoot bursts of air or liquid across the skin, resulting in extreme cold, similar to what happens when a frozen drink spills on your skin. Cryotherapy works by decreasing the temperature of blood flowing through the capillary network of your skin. Since capillaries are part of the body's defensive system, this happens without any pain or discomfort. People suffering from the symptons of Raynaud's disease or numbness will notice that their symptoms have improved after this treatment. The benefits of Cryotherapy A study published in the New England Journal of Medicine showed that a treatment known as cryotherapy was an effective therapy for people suffering from Raynaud's disease. It's been found that there were two reasons for this effective treatment: Cryotherapy works by decreasing the temperature of blood flowing through the capillary network of your skin Since capillaries are part of the body's defensive system, this happens without any pain or discomfort While the results showed that this treatment is a good option to pain, it wasn't effective for everything. People suffering from Raynaud's disease that didn't respond to analgesics were not treated with cryotherapy. However, people with both milder and more severe cases responded positively. Health experts and patients, will now know that if treatment isn't working, it's not worth trying additional treatments. While there are many other treatments available for people who are suffering from this disease, it's important to choose the best treatment. Curious about the Cryotherapy process? Why Is it so Effective? The specific physiological responses to cold When you drop a glass of iced coffee on your feet, you'll likely feel the cold as soon as it touches your skin. The same goes for when you put ice in your drink. When you drop the glass, the liquid gets the cold and is eliminated from your body. When you put the ice in
