HyperMotion Technology appears to make dribbling easier, as even from a distance, the ball reacts more accurately to the player's intended actions. Players receive more realistic feedback when dribbling, such as through more realistic scuffed shots and closer controls on passes. Konami says that "hands-on testing with thousands of genuine players on over a dozen teams across five continents" confirmed the effectiveness of the technology. The development team also promises that the ability for players to improve their reactions based on their own performance will "really help immersion." For FIFA Ultimate Team, the team behind FIFA Ultimate Team's launch team has added a new FUT Squads Matchday Kit, which replaces the current FUT Squads Jersey with a kit with a "more feminine feel," according to a post on the FIFA subreddit. The new FUT Squads Jersey has all-new sleeves and pants, while the new FUT Squads is now a "unique, custom fit" jersey with a "frilly collar" and three color options.

FIFA is a series of video games in which players control a team of players in association football (soccer) matches. The series is developed by EA Sports and published by Electronic Arts. New games are released at least once a year, typically in September. The most recent instalment in the series, FIFA 19, was released in September 2018, for the PlayStation 4, Xbox One and Microsoft Windows platforms. The franchise has been praised for its depth and realism, with the ability to control individual players and explore new ways of playing.[1] Most FIFA games are rated "E" for Everyone by the Entertainment Software Rating Board (ESRB). The "E" label indicates that the game is appropriate for all ages, including children, and the game and the developer have voluntarily agreed to be rated E for Everyone.
