Also known as a Dewey Decimal System or Library of Congress classifications, the Dewey Decimal System is a library classification scheme that originated with Melvil Dewey in 1876. While the original purpose of the system was to standardize library classification, it also proved useful for organizing other kinds of knowledge. Although a number of different names exist for the Dewey Decimal System, the most widely used is the Library of Congress classification scheme of subject headings developed in the 1930s. Although subject headings were originally developed for library research, they proved useful for organizing other kinds of knowledge. The Dewey Decimal System is typically used to organize books, periodicals, and some kinds of scholarly material, and was originally intended for institutional use. The Dewey Dec
