I have an iPhone app, developed with only 1 language. It is in sale on iTunes Store. I want to add few more languages, which means that I need to support more languages on the app. How can I do this? A: There are two ways: Upload the app to the App Store Manually add the new language, upload the app and submit it Typically I do the first option. In Xcode you have to simply choose the language you want in the scheme editor, then go to the details and select the appropriate folder for the language you've selected. To manually add languages you can select Add new target and select Apple iPhone Language. Then it will ask you for the language code and the localization file. #ifndef \_\_IMPL\_H\_\_ #define \_\_IMPL\_H\_\_ #define INIT\_VM\_MEM\_TLB\_STATUS(name, 648931e174
