In this complete guide, I am going to walk you through the steps of creating an interactive map using Adobe Illustrator, in the process creating a dynamic menu within a drop down box. If you are new to Adobe Illustrator you will find this tutorial detailed enough for you to create many useful maps. You will be able to create a map with information such as distance, population, and elevation in just a few minutes. Open a fresh new Adobe Illustrator document that is 2000 pixels by 2000 pixels. We are going to begin by drawing a Map Map (Figure 1): Drawing a Map Map Figure 1: Drawing a Map Map Next you will draw an earth with a polygon to flatten it (Figure 2): Drawing a Map Map Figure 2: Drawing a Map Map Make a separate layer for the earth (Figure 3): Drawing a Map Map Figure 3: Drawing a Map Map Next, draw a large scale map and draw a city over it with a circle (Figure 4): Drawing a Map Map Figure 4: Drawing a Map Map Next, you will draw the path for the distance map (Figure 5): Drawing a Map Map Figure 5: Drawing a Map Map Add a Circle (Figure 6): Drawing a Map Map Figure 6: Drawing a Map Map We are going to draw a background for the map and add a city as well (Figure 7): Drawing a Map Map Figure 7: Drawing a Map Map And we are finally going to add text to our map (Figure 8): Drawing a Map Map Figure 8: Drawing a Map Map Once you are satisfied with your map, click File > Save to save your map and go back to Illustrator where it should open in the current document. We are going to use the layer we just made as a background for our next map. Next we will create a layer that we can add text to (Figure 9): Drawing a Map Map Figure 9: Drawing a Map Map Click the icon in the bottom left corner to

Q: How to use custom object in method that is already returning list? Suppose that we have this method: public List DoSomething(MyType param1, List list) { // do something } How could I pass the list as parameter of the method? A: If your method is not generic you can use the following code public static List DoSomething(MyType param1, List list) { // do something return list; } If your method is generic you must have: public List DoSomething(T param1, List list) in order to be able to pass a list to the method. Description One of the best finds of the group is a solid slab of one-of-a-kind marble and quartz. Colored like marble, with some light quartz streaks, the coolness of the streaks and the colors merge to give a unique look. The surface is incredibly smooth with only a few natural scratches. And the overall shape of the slab is pleasing: it could be a work table or a counter top. Big enough to sit, stand, lie on comfortably and be used as a work surface too. Dimensions: 45 cm wide x 45 cm deep x 45 cm high. Above and below prices are for one entire piece of stone, no matter how many of them you end up purchasing. One piece of the same stone could be combined into several other pieces. Individual pieces can be combined to create endless combinations. PRODUCT DETAILS Square Shape: We love to work with circles and squares so we decided to use the shape of a circle as the main shape for this slab. The corners are rounded. 45 cm wide, 45 cm deep x 45 cm high Like a work table, counter top, or lounge chair Made in Turkey Over 13 year of commitment to creating marble and quartz slabs with quality Their highest quality marble and quartz slabs are hand-selected from the best quarries in Europe, Asia, and Africa, and are then selected by our experts. They are cut and shaped by hand by skilled craftsmen. Smallest diameter: 45 cm, greatest diameter:
