Smart Stance Control: On-the-ball controls have been re-engineered to improve the balance and responsiveness of the game. Dynamic ball control provides the ability to move the ball without receiving a card and to create more goals. Goalkeeper Sprint: In goal, you can run out of goal while avoiding defenders. Dynamic AI: Dynamic AI react and move intelligently according to a player's actions and decisions. They pass while running away, shoot while running towards goal and they can chase the ball across the pitch. Dynamic Skill Control: Players gain control of their skills and special attributes and receive more free kicks, penalties, throw-ins and corner kicks. Playmakers: Playmakers have the freedom to roam at will in midfield and create opportunities as well as an accurate long pass. Wide Players: Wide players have a wider range of passing options and the ability to drift in and out of play to create space. Passing: Players are more skilled at passing and passing out from tight space. Cuts forward are sharper, diagonal passes are more effective and non-diagonal passes are more accurate. New Play Styles: Play styles

have been updated to reflect a more dynamic tactical approach. There are more instructions on the pitch and more of a change of pace with faster and slower play. New Defensive Shape: New defensive shape takes place across the pitch rather than player positioning alone. Players have sharper run-outs to receive high-pressure situations Impact Engine: The Impact Engine automatically renders collisions, pushes and tackles with a more accurate physics response. Interactive Player Collisions: Players are affected more by player collisions and position. Greater head impact is visualised using a new improved Player Impact Engine. New Challenge Mode: New Challenge Mode includes a tournament progression that leads to qualification for the FIFA Ultimate Team and the new FIFA Mobile Club Style Championship. New Squad Building: New Squad Building includes the Career Mode that gives you the chance to grow your football club over many seasons and to play in your first ever FIFA 22 squad. The Squad Builder: In The Squad Builder, you can build a custom squad that reflects your style of play. Experience all the game's content and achievements in-

“HyperMotion Technology brings the intensity and dynamic feel of real football to life in FIFA 22,” said Tony Bates, Executive Producer on FIFA 22. “We have made huge strides in player on-ball intelligence and improved how players work off the ball, making players a lot more realistic.” FIFA 22 introduces numerous innovations and enhancements to the core gameplay of the series, as detailed below: Modern AI: Simulation-based Artificial Intelligence technologies are used to replace the “model-based” artificial intelligence used in the current iteration of FIFA, which is no longer compatible with today’s cutting-edge technology. In FIFA 22, every player’s movement, interaction, and

responsiveness is a simulation that uses the same data as an accurate match-day simulator based on the latest FIFA data. User-Friendly Agent Switch: In addition to bringing a new balance of pace and technicality to the game, the user-friendly agent switch technology of FIFA 22 provides a more intuitive experience for the player when switching from one player to another during a match. Boot-to-Shoe Flick: A new feature in FIFA 22 allows players to flick their boots to switch between agents during free kicks or corners. Unbeatable Ball-Control AI: FIFA 22 has added an unmatched ball-control system that makes passing, shooting, and changing direction in tight spaces more realistic. Second Pass Interception: EA Sports introduces the innovative second pass interception system, allowing defenders to intercept second passes more effectively. Improved Reactive Attacking: The fast pace of the game means quicker, more ruthless, and more accurate attacking techniques with more winning combinations. Improved Tackling: FIFA 22 brings a more physical and realistic feeling for defenders and allows them to make tackles that are more contact than they would in real life. Triangulated User Interface: FIFA 22 introduces a more interactive user interface that enables players to make decisions that flow directly to their position on the field with a

host of new buttons, tabs, and shortcuts that provide an incredibly intuitive and direct control scheme. All-new Long Take Progression System: Players will have to work in unison with their teammates to build a cohesive and effective team through a brand-new progression system. Voice Command: FIFA 22 allows players to use their voice to communicate with other players and team-mates during real-time gameplay. Full Player Icons: EA SPORTS reintrodu
