Photoshop provides many useful tools to enhance any image. In this book, I provide guidelines for getting great results with the tools that most work for most images. Mixing media types An image is a picture composed of pixels. The more pixels an image contains, the larger its image size. You can print a 24-megapixel image on a 4-by-6-inch print. Can you print the same size photo on a 10-by-8-inch print? This is the file size of the photo. When you print a photo at a size that doesn't contain the whole image, you lose some image size. Shrink the photo to eliminate some image size to fit it on a smaller print. In this scenario, you can increase the size of an image by combining it with another image of the same file size. For example, you can decrease the size of a canvas print and add a photo of the same size to it.

The print gives a 3-D effect to the image. You can manipulate images in Adobe's Photoshop or try other applications, but you can increase your abilities to create compelling images by mixing media types. To create an image with Photoshop, the basic process is the following: 1. Create a new, empty file (File⇒New) or open the existing file, select Edit⇒Paste, and click OK. Photoshop opens a new image in your working document and places the image in the center. 2. Locate the area in the original file where you want to begin pasting the new file or an existing file. 3. Click and drag to select the area where you want the new image to paste. The new image pastes over the previous image with the button appearing as Pasted. You can paste additional layers as many as you need to create the desired effect. 4. To layer additional information over the image, right-click the image (the button looks like a four-corners house). You then can choose Create New Layer, which creates a new layer with a transparent background. 5. Make any adjustments to the image as needed. 6. Move the image to the correct area in the working document and apply any necessary adjustments in the Adjustments panel. There are many other settings you can adjust, including using the Brush tool. You don't need to resize an image

The Blackmailer eBook “I’ll not be crowded out,” she cried. “I’ll stay—and help.” “I’m awfully glad to have you,” said Ellen. “But there isn’t much to do in the village.” “That’s always the way,” sighed Hester. “It doesn’t matter so much if there’s nothing to do. But if I was to leave here—I’d not be able to bear it.” “I understand. And I, too, should miss you very much if I couldn’t see you every day.” Hester looked across at Ellen and smiled. “Let’s hope you will never have to go, will you?” she asked. “You’re so clever—and you have so much influence.” “I can’t do you any harm,” said Ellen, simply. “I’ll only be careful what I say. I think we’re all good friends—you and me—and I’ll never let you down in any way.” “Thank you,” said Hester. “That’s very good of you. Don’t be in a hurry to disappoint me, you know.” The two girls looked each other in the eyes for a moment. Then Ellen had a sudden, insistent thought. She turned towards the window. “Do you hear the birds?” she whispered. “And over there—away—yonder—far away—far away! I can’t tell where the sound comes from. It’s as if they were flying away from me. But it’s because they seem to be flying towards the convent. And we are locked out.” “What do you mean?” asked Hester. “I mean that we are locked out. We are locked out of the convent. It’s terrible—
