New insights in the biology of chronic lymphocytic leukemia. Chronic lymphocytic leukemia (CLL) is a neoplasm of the elderly, with a median age at diagnosis of 67 years. CLL cells demonstrate

altered chemokine receptor expression patterns, have an altered chemokine environment, and a poor response to chemokine ligands. Additionally, these cells have impaired apoptosis and impaired DNA repair pathways, and

Q: How does one tell if a  
series is a Cauchy  
series? I was a bit

---

confused when looking up Cauchy series. In some places it says that Cauchy series are the ones that satisfy  $\sum a_k$  converges then the series  $\sum a_k$  converges. On the other hand if  $\sum a_k$  converges and then  $\sum b_k$  converges

---

then the series  $\sum b_k$  has to be a Cauchy series but this is not true because the series  $\sum a_k$  converges.
