File size: 2.5 MB. I found this software which can let you organize files in a hierarchical directory structure, similar to the Windows folder. A number of its great features make it a great replacement for Windows Explorer, which is a good thing. But there's something to consider, and that's the price of this great software: it's not free anymore. Hierarchical File Organizer is an outstanding tool for easily handling big files and organizing them in logical folders, and for organizing all of the files in the current Windows folder or any other folder you define. Hierarchical File Organizer is extremely simple to use, and will guide you through the entire process. First, you need to create a new folder, then drag all the files you want to insert there onto the folder's window. Finally, click OK, and Hierarchical File Organizer will start a built-in "Search and Replace" activity and create a system of folders and sub-folders. The built-in feature to create shortcuts into the organized files and folders can be used to simply organize your files in your device; they are easy to drag and drop wherever you want them. This software is a "One-Click" organizing solution, no-coding required. Most of the time, you'll just need to go through a couple of quick steps to organize your files into logical folders. Everything is very easy to use and understand, and it's free! Finally, Hierarchical File Organizer has a very helpful feature that lets you "arrange by default" files and folders with a predefined sequence, such

Still having the problem. Can you advise me what else I can do?Thanks for your help. Hello. If you're looking for a program like this there is an alternative called Start-Exit-Studio. But it isn't as advanced as StartEd Pro. I highly recommend purchasing StartEd Pro because it's more advanced, has an extremely effective clean feature, has an attractive design and is extremely easy to use. It also has a built in web browser which allows you to search the internet for any program using it to eliminate them. I use StartEd Pro on my personal computer and with my students. I've never had any complaints about it. StartEd Prois available for both PC and MAC. Check it out and see if it works for you. That is one of the best entries I have ever seen on this web site. Both you and the article writer did an excellent job of writing this. I look forward to reading more of your articles. Hello.
