### What's New in the?

\* Editor is fully compatible with Office 2007, 2010, 2013, and 2016 \* Fully compatible with Excel 97-2016 \* Takes care of the differences between Excel and the file format of Microsoft Office \* Fully supports the BigInteger, Decimal and String data types \* Makes the work with the texts of the cells easy Register now to Elerium Excel.NET Writer and receive free Excel templates. If you have any questions, please contact: support@elerium.com A: I would say that the answer is most likely Excel. Excel will be able to handle the text formatting and the numeric formatting in this case. Other solutions may be able to do some parts but are mostly different ways of using Excel as a database tool. // Copyright (c) Microsoft Corporation.
