You can use the Crop Tool to perform this task. You select the tool in the Tools palette. Holding the Shift key down while cropping will cut only the selected area, whereas holding the Alt key down will cut the selected area and drop it on to a new layer. If you don't want to drop a new layer, use the Selection Tool or the Lasso Tool instead. This is how you crop an image: The Crop tool is the first tool in the toolbar. Q: Error while creating a list and saving it into MongoDB I have a JSON string, which I want to convert into a List and save that object into MongoDB. When I create a list, it compiles but when I try to save the list to the DB it gives me this error: **Error while processing: { "_id" : ObjectId("56bf8ab597c818d9f924f972"), "value" : ["0.00"] }** Here is the code: var bytes = Encoding.UTF8.GetBytes(data); var stream = new MemoryStream(bytes); var str = new JsonTextReader(new StreamReader(stream)).ReadAsStringAsync(); var content = JsonConvert.DeserializeObject>(str); db.products.insertOne({ _id: data, value: [content] }); What I want to achieve is that when my app starts, this list is created and saved on MongoDB. Thanks. A: I just changed "value" to "array.value" and it worked. db.products.insertOne({ _id: data, array.value: [content] }); /* * Copyright (c) 2009, 2012, Oracle and/or its affiliates. Codi Wilson, CP24.com A woman has been charged with the murder of her boyfriend, who was fatally shot in North York on Wednesday. Police allege that the woman, who was the couple's sole caretaker, killed 41-year-old Robert Smith because of a mental illness. She is being held in custody until her next court appearance on Jan. 9. Smith died after being shot outside an apartment building in the Regent Park and West Rouge Park area on Wednesday afternoon. Police responded to a call at approximately 3 p.m. and found the injured man with "multiple gunshot wounds to his upper body." Paramedics rushed Smith to hospital where he later died. One witness told CP24 that when she arrived at the scene, she heard a woman yell that her boyfriend was shot and asked the neighbours to call the police. Some residents said they heard "loud noises" outside at 3 p.m. The shooting happened outside of an apartment building at the corner of Wilson and Glenridge roads. Police are currently searching the area for evidence. Surveillance video released by police shows a woman's bicycle being stolen from a unit near where Smith was found. The video shows two unidentified females riding their bicycles on the street at around 3:23 p.m. Police said they are now searching for one of the women in connection with the homicide.Decay of competitive effects in aggregated retinal ganglion cells. Dendritic arborizations of retinal ganglion cells in the cat ganglion cell layer are more extensively distributed in zones of high cell density than elsewhere in the retina. The reason for this difference in the distribution of dendritic arborization is unknown. While it is clear that dendritic arborization can increase nonlinearly with the number of neighboring cells, the full extent of this effect in the cat ganglion cell layer is unknown. In the present study, the extent of nonlinear morphological response of ganglion cells to growth-promoting factors was examined by quantitatively analyzing the decay of competitive effects in aggregated retinal ganglion cells. Growth-promoting factors included classical trophic substances (proteins), neural trophic factors (transforming growth factor-beta), and trophic hormones (cholera toxin). The various substances were introduced directly into the vitreous chamber
