Let you know, the pair couple was together seen in Ishaqzaade. Q: Xamarin, Android, view.click event not working after posting task I have a simple example of Android DatePicker in Xamarin. I have a view where I can select date. And for this I have two handlers, clickDate and clickCancel. Click date works fine, but when I post task with adding a new Date, click cancel is fired, after pressing cancel it works fine. DatePicker view Xaml.cs protected override void OnCreate(Bundle savedInstanceState) { base.OnCreate(savedInstanceState); SetContentView(Resource.Layout.activity_main); pickerStart = FindViewById(Resource.Id.pickerStart); } private void clickDate(object sender, EventArgs e) { Toast.MakeText(this, "Date Selected: " + pickerStart.SelectedDate.ToShortDateString(), ToastLength.Long).Show(); } private void clickCancel(object sender, EventArgs e) { pickerStart.DatePicker.PickerSelectedDate = DateTime.Now; finish(); }
