Ghostly Outcry Over Mysterious Mom Passed Away After Missing Kids DePaul, Illinois (AP) - The body of a woman believed to have passed away a day before was found in the basement of a house in a Chicago suburb. The Winnetka Police Department says detectives were called to a home Tuesday about a suspicious death. They found the body of a woman in the basement of a home, where her three young daughters were present. A purse was also found with money inside. A three-year-old and a 6-year-old were found upstairs with a neighbor, who said the mother of the two children had left with them Tuesday afternoon. No arrests have been made. Investigators say they're trying to figure out what happened, but don't have many leads. There are many different ways to look at the different regions of the brain that govern our heart and start of the discussion of the different types of heart attacks, like the STEMI or the NSTEMI. The two types of heart attack are named after the part of the heart that suffered the most damage: Myocardial Infarction Occurs when the coronary arteries that supply blood to the heart muscle become blocked (arteries that go to the heart) Extended Myocardial Damage Occurs when oxygen-starved heart muscle starts to malfunction. When oxygen-starved muscle is damaged it is known as myocardial

infarction or heart attack. The most common type of heart attack is called myocardial infarction, which is caused by a blockage of an artery that supplies the heart with blood. Heart attack survivors can suffer a number of complications Arrhythmia Heart attack survivors can develop abnormal heart rhythms which can cause unstable angina, chest pain, palpitations, nausea, fatigue, shortness of breath or fainting. In some cases those with coronary artery disease can experience chest pain, known as angina pectoris. The two most common and important heart attacks are – Myocardial Infarction Extended Myocardial Damage The two types of heart attacks can lead to different ways in which your heart attack will go. Think of this: If a chest x-ray is taken after you have a heart attack, the x-ray will show your heart to be enlarged and damaged. You may have another heart attack In the case of a STEMI, or ST segment elevation myocardial infarction, your heart has suffered extensive damage because of the blockage in your arteries. If you have a STEMI, your heart needs to be treated immediately.

The benefits of the treatment include improved survival. The reason for the high survival rate is that STEMI is one of the
