Rar. .UNOPEN.Third-world terms Third-world terms are terms used in business and industry to describe countries which are in a state of economic and political underdevelopment. The term comes from the period around 1960, when the countries of Africa and Asia were referred to as the Third World. The Third World was a term used by the UN to describe those countries that were referred to as less developed. The term may also be used to refer to a geographical area, and in that case, the term typically refers to a sub-region of the world outside the developed world of North America and Europe. In the United States, for example, a consumer may choose to make a purchase in the "third world", although the purchase may have originated in a developed country. Third-world terms are often used in opposition to first-world terms, as being an opposite in a social context. For example, third world terms include those countries not only as those that are experiencing economic development but also those that are politically stable and politically mature; whereas first world terms generally refer to those countries which are socially more developed. Third-world terms are sometimes used to describe any countries that are in a state of underdevelopment, when the specific term is not relevant, such as "in the third world", when the context is clear. Third-world countries are not necessarily the poorest countries in the world, as is the case with countries such as Bangladesh, Sierra Leone, and Congo; although, historically, such countries have been among the poorest. The term was also used by political activists to refer to the developing countries, to imply that the world was politically polarised into two categories, the First World and the Third World, with the intention of putting pressure on the First World to assist the Third World. More recently, the term Third World has been applied to areas in North America (particularly Southern United States) where social class, race, and culture have created such a divide between the rich and the poor, that they have been called "the third world".
