This feature brings to life all the unpredictable movements and strategies on the pitch during a match. Players can then choose to be aggressive or passive on the ball, enabling the creation of unique dribble and pass animations, player models, ball physics and movement. “We wanted the most authentic way to replicate the unpredictability of real football,” said Michael Coll, Technical Director at EA SPORTS. “Over the course of a match, a player can be aggressive or calm, active or passive, patient or quick. It all comes down to the player, not the player model.” From the outside, a player’s decision to be aggressive, passive or calm-looking usually sets the tone for the rest of the match. Players that are the opposite of their real-life counterpart will have a noticeable impact on the way they play. This means that each player will perform differently in FIFA 22 based on their unique attributes. Some players will be faster than others, while others may even take more risks. Players’ actions on the ball will also affect how they perform in other ways. Passes that are too short, rushed or high risk could result in balls being intercepted or lost in the air. Fouls and fouls could provoke a reaction from opponents, and players can be sent off for diving. Players can also be more aggressive and forceful with the ball, especially when playing through midfield or in a counterattacking role. Players can even be unpredictable in their movements, and it can impact their teammates. This will influence the way other players run towards open space or move away from pressure. “Player models are the foundation of FIFA,” added Jeronimo Barraza, Lead Character Animator at EA SPORTS. “They allow us to achieve a level of technical authenticity on the pitch.” FIFA 22: Keep on Moving As the name suggests, the new motion-capture-based “HyperMotion Technology” is a key feature of FIFA 22. This feature powered by the “Keep on Moving” motion capture system includes a series of new player animations, ball physics, more advanced movement and tackles, and collision detection. In FIFA 21, the “Keep on Moving” system allowed players to run with extreme speed and intensity. It offered users the ability to test the limits of how fast and accurate they could press the run button. “We

Fifa 22 Features Key:

- Live out your dreams as both a manager and a player in FIFA 22.
