You will need to create a backup copy of the installer beforehand. 1.2 - Wednesday, March 12, 2013 I've been continuing to work on fixing up the "instructions" that I'll be putting on this program for people. I have a day job (which you can figure out), so I'm working and playing around with this stuff here, and posting it on my Youtube channel here: And this is where I'll post it all on this forum. At any rate, I have done most of the work that the PSKP did in the April 2011 version of the plugin, and it is probably better than the October 2011 version that I made. This version will only include the "Photoshop Plugin Kit" (PKN) and will include "MaskPro" for use with Mac OS X. So you should be able to use the PKN + MaskPro with Windows, Mac, and Linux. I have removed every single "unnecessary" action that was included in the plugin, and have kept only the actions that are necessary to create the actual masks for working with the plugin. Included in this release are: "Brush Tool", "Paint Tool", "Pen Tool", "Circle Tool", "Square Tool", "Path Tool", "Rounded Rect Tool", "Hair Tool", "Master Brush Tool", and "Photoshop Tool (No Support)", "Erodes", "Dodge & Burn", "Color Range", and "Spot Healing". I have also removed every single false feature that was included in the plugin, and added some features that are different from the original. So the "vista dragonfly" command has been removed, as has the "Bryce" style effect "BryceHD.exe -command FontName -serif" feature, as well as the "Windows Vista" feature. I have added the following features: "Alphabet Generator", "Hemolytic Texture Mask", "Blurred Spot", "Layer Mask Animation", and "Paintbrush and PS.
