Banner Wizard (formerly MTool Banner Maker) Torrent Download

Banner Wizard is an easy to use tool for creating banners that will let your ads stand out from the rest. A large preview window allows you to look at the effect of your work from all directions at once. Add objects such as a background image, drop shadow, animation and more. Create all types of banners. Save and publish all as SWF files. Create and use Flash frames. Banners feature Flash loading and high resolution quality. Invite and share your work with others. Create custom HTML code. Standard and advance HTML. Import and integrate Flash items from other software and websites. Key Features: Simple to use: Easy to use tools and features make it easy to create banners with no or minimal technical knowledge. They are available in a user-friendly interface that lets you easily drag and drop the needed items in the canvas. Powerful tools: A large preview section shows you what your banners will look like from all directions at once. This way you have the option to quickly accommodate for changes. A double mouse click reveals every option to let you instantly adjust or fine-tune the effect. Adding backgrounds is a breeze, drag and drop your chosen image or URL. You can easily create any type of banner you can think of. Create Flash frames: High resolution banners include a Flash loading and preview to make your work stand out from the crowd. All flash objects can be easily imported from other software and websites. Choose from 4 CSS page templates. Generate HTML pages by uploading your banner. Advanced HTML: Create many types of HTML-banner styles, including background, header and footer settings. You can use any of the Page templates. All HTML elements and settings are adjustable. Customize your HTML. Dynamically alter HTML-based elements. Handle HTML-based links, Flash objects, text, images, buttons, images and videos. Generate code by uploading your banner, which will then be encoded on the client side. Create banners: Create various types of banners, including static, animated and more. All without any previous knowledge in the software. Have fun! Create some customized banners for your website. Export objects as SWF files: You are able to save your work to SWF files and upload them as ActiveX components to your websites and share them with others. Exporting is easy to do. Quickly save and export your work. Customize Flash loading: The Flash file displays the banner immediately after its insertion. Just set its play time manually

What's New In?
