The antivirus definition updates are important for your security against new threats. This product includes the most up-to-date definitions. Each month a definition update for the following software is included: Mozilla Firefox Mozilla Firefox add-ons Opera 10.5 Yahoo Mail Google Chrome Google Chrome add-ons P2P Torrent file types Symantec Antivirus Free Unused for personal use. Requires Windows XP, Vista and 7, 32-bit and 64-bit. You have been using the Symantec Norton Community Edition for a long time, but the virus definitions are not updated anymore. Why should you upgrade your tool? You can scan up to 4 devices at the same time, and you don't need to reinstall the software on each of them. 1.9 GHz processor 2.4 GB RAM 2 GB free hard disk space 3.5 GB available hard disk space (for downloads, cache and logs) Can I install the Symantec Norton Community Edition and the Symantec Norton Essential Suite at the same time? No. The Symantec Norton Community Edition software can be installed on a computer without a firewall, while the Symantec Norton Essential Suite requires a firewall in order to work. Please note that the VirusBarrier internet security suite is fully compatible with the Symantec Norton Essential Suite and is a good alternative to the Symantec Norton Community Edition. Can I use the Symantec Norton Essential Suite with a firewall? Yes. You can use the Symantec Norton Essential Suite with a firewall as long as the firewall is not blocking the installation of non-Symantec security products or services. If the Symantec Norton Essential Suite is installed without a firewall, it will be disabled and will not work. A firewall must be

installed and the firewall must be configured to allow both the Symantec Norton Essential Suite and the VirusBarrier internet security suite to function properly. Is the Norton Essential Suite available in a trial version? No. The Symantec Norton Essential Suite is not available in a trial version. However, if you buy the Symantec Norton Essential Suite directly from Symantec, you will have a 7-day trial and will be able to use all the product features during the 7-day trial. How do I setup

4 71 Reality Protectoria is an anti-spyware application designed to protect your privacy and the security of your personal information. The program is easy to use and provides you with a number of features you will not find in most other anti-spyware tools. The software offers a comprehensive inspection of all active programs, files and registry entries. This makes sure that all threats are identified and blocked before they can do any damage. To make sure your personal data is not being accessed by unknown programs, Reality Protectoria will check whether you have visited suspect websites, downloaded and installed potentially unwanted applications, or opened e-mail attachments. It will also let you know whether you have visited certain pages on the Internet, or downloaded files, or other documents which you might not have intended. Furthermore, Reality Protectoria will also tell you which active programs you should investigate first. The software is easy to use and doesn't take long to complete an in-depth analysis. In addition, you can monitor your privacy settings and modify them anytime you want. Panda Dome Premium Security The antivirus suite includes a virus scanner that can identify and delete dangerous files. The malware remover is designed to eliminate malicious programs that are exploiting vulnerabilities in your computer. The firewall prevents unauthorized attempts to access your computer and provides you with detailed information about your online activities. Panda Dome Premium has many other useful security tools, such as an Internet proxy, an autorun blocker and a clipboard manager. These tools will allow you to protect your computer even when you are not using it, so you don't need to worry about hackers breaking in when you are away from your computer. The program has a user-friendly interface. Its main window has a simplified design and only displays minimal information about the active tools you have set up. Furthermore, the application does not take long to perform an in-depth scan of your personal computer. There is also an option to create a scheduled scan. If you want to check the activity of your browser, you can also activate its Internet proxy, which will allow you to browse the Internet securely, prevent prying eyes from seeing your private data and edit cookies. In addition, you can simply export your personal information as a text file and share it with other people, if you are concerned about your personal privacy. The program can also protect your privacy when surfing the Internet as it will prevent spyware or
