Spiff NTFS Explorer is a simple-to-use software program that gives you the possibility of effortlessly exploring NTFS drives, directory and files in a comfortable workspace. It does not contain complex features or configuration settings, making it suitable for all types of users. Hassle-free installation and simple GUI Setting up Spiff NTFS Explorer is a fast and easy task, thanks to basic installer options. As far as the interface goes, Spiff NTFS Explorer adopts a normal window with a plain and simple structure, where you can get started by initializing the scanning procedure. So, you can pick the NTFS volume to explore and use a tree view to navigate directories and locate files. By opening the right-click menu it is possible to inspect any file or folder's MFT (Master File Table) and even copy data to the Clipboard if necessary. View drive info and scan for deleted files The application also lets you view drive information (including S.M.A.R.T. attributes) and change the viewing mode (e.g. list, details). In addition, it integrates a function for locating deleted files on any NTFS partition by applying filters. However, the free edition of the app does not let you recover any files. Evaluation and conclusion CPU and RAM consumption was minimal throughout our tests. There were no kind of problems, since the tool did not hang, crash or display error messages. All in all, Spiff NTFS Explorer offers a simple solution to examining NTFS information, featuring intuitive options for all user levels. My IT skills are not that good but i am trying to learn more of it. The best way to do that is to gain more knowledge in many different areas. This will allow me to gain experience in different problems I may come across in the future. I was wanting to learn how to program in python so I can use the Play Store. Play Store, in my opinion, is a great site to search for apps but, if you don't already have a programming knowledge you can't really find much. If you can program in Python you should be able to play around with the API yourself by poking around. The API page has a language picker you can use to search what all Play Services have and see how they work and things that you can do. I believe you can change the C/C++ code of the app as well. The source code for most Play b7e8fd5c8
