Photoshop Elements: How to Edit an Image with Elements At first you might find it difficult to edit images and textures in Photoshop Elements, but with a little experience, you'll be using its tools with ease. A good idea to get started is to start with an easy-to-edit image like a standard black and white photograph or a building scene. You can import and edit images on your computer screen to see what works and what doesn't, without having to use Photoshop. There are three tools in Photoshop Elements that you'll need to use to edit an image: The Brush tool: To add textures, add colors, and do fine-tuning. To add textures, add colors, and do fine-tuning. The Clone tool: To cut or copy and paste elements, feathering them and to make them sharper. To cut or copy and paste elements, feathering them and to make them sharper. The Blur tool: To smooth out the image or to remove objects, or to increase contrast and make sharpening easier. For the next ten to fifteen minutes, you'll be using all of the tools, and these three will be your main tools of the trade in the process of editing an image. When you're ready to start with the photo, follow these steps and you'll be editing that image in no time: Open your image with Photoshop Elements. Using the Import or Save As dialog box, you can import an image from a camera or your computer screen. You can also import an image from your scanner, your scanner software, or from a memory card. Use the Effects>Filters>Blur filter to make images sharper. Use the Filters>Sharpen to adjust image contrast, and use the Tools>Adjustments>Brightness and Contrast tool to increase or decrease

Create New Brush: To create a new brush, click on the Brush tool. In the toolbox, drag a new brush to the toolbox. This will open the brush settings dialog box. In the dialog box, you can change the options for your brush. You can choose a custom shape (which can be rectangular or polygonal), a tolerance, and specify whether the brush will be a normal or hard brush. Here are the Brush Controls for a Normal Brush: Here are the Brush Controls for a Hard Brush: Use the Brush To Fill a Selection: You can use a brush to fill an area that you have selected. The following image has a section that was selected with the Magic Wand. The section was then filled with a red brush. Select the brush tool and click on the section of the image that you want to fill. A blue square will appear. With the size of the square set to a large size, click to set the starting point. With the size set to a small size, click to set the ending point. Then, using the arrow keys, move the mouse over to any point that you want to paint, and start painting. To quit, move the cursor away from the image. Reselect the selection with the Magic Wand, or erase the selection with the Eraser tool. Click the large square in the toolbox to return to a normal brush. Use a Brush to Fill an Entire Image: When you first paint, you will probably want to erase the pixels that you paint with. You can select where you want to erase by using the Eraser tool. Then, click the brush that you want to paint with. Paint where you want to paint. To erase the area where you painted, select the Eraser tool, and erase where you painted with the brush. To paint with a brush all over an image, you must first select the Brush tool. Click on the image. You will see that a square outline of the image appears around the brush that you selected. This outline shows you where the brush will paint. Paint with the brush over the entire image and you will see that paint is applied across the entire outline of the image. To get rid of the outline, you must erase it with the Eraser tool. Use a Brush to Paint an Edge: To paint a straight line or
