Cool Mix Edit

With Cool Edit we have compiled over a decade of experience in audio editing. We have collected all the tools you need for your DAW and we even invented a few on our own. At work and at home you can record and edit your favorite music, sounds and audio files and open and mix them without stopping what you are doing. And with multiband recording and virtual mixing you can also record your mixdowns and send them to any device. Features: ¬¬- Multi-Track Recording Record your music, vocals, sound effects, or anything you can think of as individual tracks. If you forgot to record something, just load the track with the missing content and you are good to go. ¬¬- Four Tracks at a Time Record your music or vocals as four individual tracks at a time. It's easy and fast. Just select four tracks, set the format and the bitrate and start recording. Then you can set the individual tracks as virtual tracks or crossfade between them. ¬¬- Undo/Redo Record, cut, paste, reverse and repeat your tracks without pause. If you made a mistake, Cool Edit remembers the last position you left it and continues without interrupting the flow. ¬¬- Recording with Locking Lock and unlock your recording while keeping the position and format intact. It's easy and saves your sanity. Just lock your audio or let it lock itself when you stop. ¬¬- Virtual Mixing Mix your four tracks all at once and undo as much as you want. Then mix them back with the virtual mixer and record the result to the audio file. ¬¬- Mixdown Recorder This feature is the same as recording your mix in multiband mode, but in addition it records each band in its own track. This way you can save several tracks of different instruments and mix them any way you want. ¬¬- Audio Widget Take advantage of the powerful audio widget for your DAW. Record the audio you are hearing from your speakers, mix it with the mixdown feature and create your own audio stream. ¬¬- Free Form Mapping You can export the audio widget to.wav,.aiff,.wav,.ape,.flac,.wv,.wav,.aif,.aiff,.ape and.au files. ¬¬-
