It allows players to use more natural, fluid and dynamic movement, in a way that only players can. Whether it's sprinting at full speed or performing low-impact dribbles, players will feel like they are doing those moves in the game. The potential to make high-risk passes that normally require good ball control also adds fluidity and dynamism to dribbling. The player-worn goal-to-goal and close-range dribble moves have been further improved so that they more closely resemble their real-life counterparts, making attacking plays even easier to pull off and creating even more goal scoring opportunities. Finally, FIFA 22 introduces "Dynamic Progression," making it possible for player skills to develop throughout gameplay. This allows players to become more difficult to mark throughout their career, and rewards those players who regularly come up against more skilled opponents. FIFA 22 is set for a PlayStation 4 launch worldwide on September 27. For more information, visit www.fifa.com/22.ProductDetails
