## **Features Key:**

- Adapting to what you see. When played in-game, FIFA's cameras paint a picture of your arena from left to right based on the viewpoint of your opponents. You can call upon this information by adjusting the camera angle and position, or by replicating the

visual on a virtual pitch in the Editor.

- Collision. More head-first tackles, more collisions, and more motion capture. “HyperMotion” makes every action, tackle, and run near you feel like a Hollywood blockbuster.
- Skill moves. Master all of the new head-to-head, body control, and off-the-ball skill moves, which lets you make more goals and tackles to showcase your ability.
- Pro Savvy. FIFA 22 tracks every interaction with the ball, every run, every pass, in a wealth of new ways. The Producer Explains: “Our team are working hard to analyse every player’s performance.”
- New mechanics make for more goals. For the first time in the series, certain dribbling techniques and by-product passes have been factored into the trajectory of a player. If you fake someone out and then pass, your pass will now face towards the player that was being dribbled past. You’ll have to take advantage of every opportunity if you want to be the all-time leading scorer.

Edit - You can read about the PS4 Pro in the hands-on preview of the game here. While there are a lot of enhancements that the PS4 Pro brings to the game, it's fairly subtle, and mostly just looks better. The PS4 Pro doesn't change how the game looks, and the game is largely the same as it was on a standard PS4. You can use other Sony PS4 Pro enhancements, however, like upscaling 4K games to 2160p. EDIT: This has been updated to clarify that you can use other PS4 Pro enhancements like upscaling 4K games to 2160p in FIFA 22. You don't need a Pro for that functionality, but the game does support the enhanced graphics of the Pro. FIFA 22 is coming to the PS4, PS3, and PS Vita on February 26, 2017.
