 is a decimal or integer in C#? I want to write a method to check if a given string is a
 decimal value or an integer value. The function parameters are string fieldName, int value,
 and decimal precision. public string ConvertStringToDecimalValue(string fieldName,int
 value,decimal precision) A: Do you want to check if the value is a number? If yes, just do
 something like this: decimal value =... bool isNumber = Convert.ToDecimal(value) ==
 value; EDIT: Here is a full example that validates a string can be converted to a valid
 decimal: using System; namespace ConsoleApplication12 { class Program { static void
 Main(string[] args) { decimal value = 12345.678M; decimal isGood =
 Convert.ToDecimal(value); decimal isGood2 = 12345.678M; bool isGood3 = (isGood ==
 value); bool isGood4 = ((isGood == value) && (isGood2 == value)); if (isGood ==
