Adobe Lightroom In the previous pages, we talked about Photoshop as a professional-level program, but Adobe Lightroom is not only a popular photo-editing program, it is also a full-featured photo workflow tool. It consists of the Adobe Lightroom program and Adobe's membership program, Lightroom Classic. Lightroom Classic is available for a yearly fee of \$49.95 (that's zero dollars and \$49.95), while the Adobe Lightroom program is available for a monthly fee of \$19.95 (that's

---

zero dollars and \$19.95) or a yearly fee of \$299.99 (\$19.95 a month). In its most basic form, Lightroom Classic is a collection of tools for organizing, arranging, cropping, and adjusting photos. It's a multipurpose program that can create slideshows, do basic image cleanup, and even create simple Web galleries. With its Creative Cloud membership option, Lightroom now includes preset adjustments for common photo issues, as well as photo books, mobile apps, and cloud backup and sharing. Adobe suggests that Lightroom be used as an

---

intermediate-level photo-editing program. However, at its most basic level, Lightroom can also be used for beginners to edit basic photos and simple master-shot portraits and weddings. Lightroom does not have an exhaustive collection of editing tools; it's designed to work with the supplied presets that are fixed with the software. It can, however, handle multiple image edits at the same time and can have multiple overlays working on the same image at the same time. It's perfect for photographers who don't have extensive Photoshop experience

---

and want to organize and display their photos. Adobe Lightroom has a distinct layer-based editing system that enables editing and can support transparency. Adobe suggests using Lightroom as a last resort to work with final-quality images, not as a beginning program for beginners. A good guy with a gun shouldn't be considered a threat, but last week, a shooter at an Oregon school told officers he was going there to kill students. A week later, a police officer at a New Mexico school shooting told a couple he was sorry for the distress he was causing them, and then waited before pulling his gun and shooting the attacker to death. Both situations, in which police were able to save lives or prevent further bloodshed, followed the same script: Officers did not act because they thought

---

their presence would be a danger to innocent civilians or prevent the attack. Instead, the first officer to intervene told his colleagues he felt as if he was in imminent danger of being shot. They were wrong. But, from the police perspective, the outcome is a better one because it involves no rounds fired in the line of duty. The officers' reports, videos, and messages have emerged on a stark, unavoidable backdrop: Nearly 20 percent of officers shot and killed by police are unarmed. The recorded deaths of more than 120 people across the country since January have caused

outrage. Numerous reports say race relations may be at an all-time low. Many officers don't think their lives have been put at risk by their colleagues. But in the months since the deaths of officers Rafael Herrera and Wenjian Liu, it has become clear that some officers perceived using deadly force as necessary for their own protection. की गई और हंसते हैं। और इन दानियों, हम अपने वपिरीत वेबसाइट पर आधारित डेस्क देख रहे हैं। एक बार हर लड़के और लड़कियों को आप से नोटफिकेशन देते
