Screenshots: Documentation: Changelog: Feedback: Warning: If you download the application's source code, you need to unzip it. If you already downloaded the source code and want to install it, you need to unzip it again. I've created this repository to share an app I've spent a lot of time building. The repository contains the source code I'm using to build the application. I also keep an archive of the source code here: I spent a lot of time downloading the libraries I use in the application, but these files may be different between the source code and the archive of the source code. These scripts are used to uncompress the original archive file. The script is a stand-alone script, you don't need anything else to use it. Thank You.
